CAREER OBJECTIVE

To apply my knowledge of computer science, programming, and software development to solve real-world technical problems while continuously learning new technologies and improving my problem-solving skills.

EDUCATION

Silicon University, Bhubaneswar, Odisha | **2024–2028**
B.Tech in Computer Science and Engineering (CSE) | **CGPA: 9.40**

Saraswati Shishu Mandir
Class XII: 76% | Class X: 80%

PROJECTS

SatQuery AI — Agentic AI for Satellite Image Understanding | React, Vite, Python, FastAPI

- Developed a React/Vite interface and FastAPI prototype with API flows for satellite-image upload, natural-language query submission, and result retrieval.
- Integrated an agent-routing layer for geospatial analysis; advanced end-to-end analysis capabilities remain under development.

LifeLink — Blood Donation and Emergency Blood Management System | MongoDB, Express.js, React, Node.js, JWT

- Worked on a MERN-stack application intended to support blood donation and emergency blood-management workflows.
- Worked on backend API routes and JWT-based authentication; verify individual modules against the current code before submission.

WiFi Transparency Analyzer | React, Vite, Python, FastAPI

- Built a React frontend connected to a FastAPI backend to present Wi-Fi and network diagnostic information.
- Created interface sections for Wi-Fi/network information, connected-device discovery, DNS testing, and port scanning.

TECHNICAL SKILLS

Programming Languages: C, Python, Java, JavaScript
Frontend Development: React, HTML, CSS
Backend Development: Node.js, Express.js, FastAPI, REST APIs
Database: MongoDB
Developer Tools: Git, GitHub, VS Code, Postman
Additional Knowledge: Cloud computing and DevOps fundamentals

ACTIVITIES

Campus Life Coordination Committee (CCC) — Member
