ADITYA KUMAR

Bhubaneswar, Odisha | +91 9262660345 | officialadityakumar4005@gmail.com | github.com/Aditya-Kumar-Official | linkedin.com/in/aditya-kumar-a8915034a

EDUCATION

Silicon University — **Bhubaneswar, Odisha | 2024 – 2028**

Bachelor of Technology in Computer Science and Engineering (CSE) — **CGPA: 9.40 / 10.0**

Saraswati Shishu Mandir

Senior Secondary (Class XII): 76% | Secondary (Class X): 80% — [C.B.S.E]

TECHNICAL SKILLS

Programming Languages:	C, Python, Java, JavaScript
Frontend Technologies:	React.js, Vite, HTML5, CSS3
Backend & APIs:	Node.js, Express.js, FastAPI, RESTful APIs, JWT Authentication
Cloud, Databases & Tools:	AWS (EC2, S3, IAM), Docker, CI/CD, Linux, MongoDB, Git, GitHub, VS Code, Postman
Core Concepts:	DSA, OOP, DBMS, Cloud Computing, DevOps, Computer Networks

INTERNSHIPS & TRAINING

MERN Stack Development Intern — **CODE BEAT | 6 June – 12 July 2025**

Full-Stack Web Development (MongoDB, Express.js, React.js, Node.js)

- Developed and maintained responsive full-stack web applications using React.js on the frontend and Node.js/Express.js on the backend.
- Designed RESTful APIs and integrated MongoDB database schemas to handle dynamic CRUD operations and user data management.
- Implemented secure authentication workflows using JWT and collaborated on API testing and debugging via Postman and Git.

AWS & DevOps Summer Training — **Ingenious-TechWorld | 25 May – 30 June 2026**

Cloud Infrastructure & DevOps Practices

- Completed hands-on training in core AWS cloud services (EC2, S3, IAM, VPC) for deploying and managing scalable cloud applications.
- Practiced modern DevOps workflows including Linux server administration, containerization with Docker, and automated CI/CD pipelines.
- Configured cloud security groups, identity permissions, and version-controlled deployment pipelines using Git and GitHub.

TECHNICAL PROJECTS

SatQuery AI — Agentic AI Prototype for Satellite Image Understanding — **React, Vite, Python, FastAPI**

- Architected a full-stack web prototype enabling users to upload satellite imagery and submit natural-language queries for automated visual analysis.
- Developed asynchronous RESTful API endpoints using FastAPI to manage image payload ingestion, query preprocessing, and structured response delivery to a React (Vite) client interface.
- Engineered a modular agent-routing layer to dispatch user prompts toward geospatial inspection workflows, establishing an extensible foundation for multi-step analysis.

LifeLink — Blood Donation & Emergency Management System — **MongoDB, Express.js, React, Node.js, JWT**

- Developed a full-stack MERN web application designed to streamline donor registration, blood inventory tracking, and emergency blood request workflows.
- Designed and implemented backend RESTful routes using Node.js and Express.js backed by MongoDB schemas to manage donor profiles and emergency requests.
- Integrated stateless role-based session security using JSON Web Tokens (JWT) to protect user authentication and sensitive route access.
